

Introducing New Sanden Wifi Controller* – Now You Are In Control!!!

It has been designed to provide remote access to the Sanden GAU-A45HPD Heat Pump unit, via a smartphone or tablet.

Functions include:

-  **One Touch Boost** – you will never be without hot water!
-  **Multiple Timer Programming** – suitable for use with your PV generation to control energy use
-  **Energy Saver Mode** – provides reassurance of minimum energy use.
-  **Error Reporting** – allows detailed understanding of Heat Pump unit operation.
-  **Remote Access by authorised Sanden Installers** - to complete health checks and fault finding.
-  **Information reporting** – many Heat Pump unit operational aspects including Power Consumption, Current Status, Water Temperature and Operation Time.

*Patent Pending
